Toilet 1					
Toilet 2					

TIPS TO DETERMINE GALLONS-PER-FLUSH VOLUME

- Look for marks or labels near the toilet seat hinge. A 5-gallon per flush (gpf) toilet might be shown as 22.73 liters, a 3.5 gpf as 15.91 liters. All 1.6 gpf (6.1 liters) toilets should be marked at the toilet seat hinge. If no markings are present, check the underside of the tank lid or the tank's back inside wall for a date stamped in the porcelain. Toilets produced before 1985 are 5-7 gpf, a date between 1985 and 1991 would be 3.5 gpf. All toilets made after 1993 are 1.6 gpf.
- There are two ways to conduct a Toilet Water Use Test. The most accurate way is by measuring the tank.
 - Measure the length and width of the tank in inches.
 - Measure the full water level in the toilet tank in inches (depth 1).
 - Flush the toilet and measure the drop at the lowest level (depth 2).
 - Subtract depth 2 from depth 1. This will give you the "drop" measurement.
 - Multiply the length times the width times the "drop" to determine the volume of cubic inches of water used per flush.
 - Divide the volume by 231 to get the number of gallons per flush

REBATE CHECKLIST & ACKNOWLEDGEMENT

- The ORIGINAL dated sales receipt or Invoice showing the price of each toilet, toilet model number, date, and purchase location.
- A copy of the most current water bill (if the bill is the responsibility of the applicant)

Please read the paragraph below carefully before signing. Please call (803) 385-5123 if you have questions.

I have read, understand and agree to the terms and conditions of this rebate application. I understand that there is limited funding on a first-come, first-served basis and my application may be denied due to lack of funding. I declare under penalty of perjury of the laws of the State of South Carolina that all of the information provided herein is true to the best of my knowledge. I hereby certify that I am authorized to replace the toilets at the address listed above. This program does not guarantee the high efficiency toilet(s) performance or workmanship. I agree to a post-installation verification. I am responsible for the high efficiency toilet cost above the rebate amount, SC sales tax, and installation charges.
